

IN THE SPECIFICATION:

Please replace the paragraph beginning at page 2, line 20, with the following rewritten paragraph:

To resolve the above problem, a telephone ~~[[of]]~~ pertaining to the present invention ~~is for displaying a local time of a locality of a callee, and~~ includes an acquiring unit operable to acquire a telephone number of a callee and region information relating to [[the]] a locality of the callee, a judging unit operable to judge whether the telephone number is a telephone number satisfying a predetermined condition that enables international roaming in a telephone network of a region in a different time zone, a storage unit operable to store the telephone number, identification information identifying the callee of the telephone number, and the region information in association with each other, based on a user operation, if judged in the affirmative, a calculating unit operable to calculate ~~the calculate~~ a local time of the locality using shown by the stored region information, with reference to the storage unit, if a user operation selecting one of the telephone number and the identification information is performed, and a display unit operable to display the local time.

Please cancel the paragraph beginning at page 3, line 5.

Please replace the paragraph beginning at page 4, line 8, with the following rewritten paragraph:

Also, the region information may be recorded in a location register that manages a movement locality of the telephone of the callee in a telephone network, and the acquiring unit may acquire the region information from the location register via the telephone network.

Please cancel the paragraph beginning at page 5, line 7.

Please cancel the paragraph beginning at page 5, line 16.

Please cancel the paragraph beginning at page 5, line 14.

Please cancel the paragraph beginning at page 5, line 19.

Please cancel the paragraph beginning at page 5, line 25, and bridging to page 6, line 4.

Please cancel the paragraph beginning at page 6, line 5.

Please cancel the paragraph beginning at page 6, line 14.

Please cancel the paragraph beginning at page 6, line 24, and bridging to page 7, line 7.

Please replace the paragraph beginning at page 7, line 8, with the following rewritten paragraph:

A telephone system ~~[[of]]~~ pertaining to the present invention includes a telephone network for managing a movement of a first telephone, and a second telephone for displaying a local time of a locality of the first telephone. The telephone network includes a location registration unit operable to record region information relating to the locality of the first telephone, a reception unit operable to receive from the second telephone, specification information specifying the first telephone, and a notifying unit operable to notify the region information to the second telephone, upon receipt of the specification information. The second telephone includes an acquiring unit operable to acquire ~~the region information from the telephone network~~ a telephone number of the first telephone, a judging unit operable to judge whether the telephone number is a telephone number satisfying a predetermined condition that enables international roaming in a telephone network of a region in a different time zone, a storage unit operable to store the telephone number, identification information identifying a callee of the telephone number, and the region information notified from the telephone network in association with each other, based on a user operation, if judged in the affirmative, a calculating unit operable to calculate the local time of the locality using shown by the stored region information, with reference to the storage unit, if a user operation selecting one of the telephone

number and the identification information is performed, and a display unit operable to display the local time.

Please replace the paragraph beginning at page 7, line 23, and bridging to page 8, line 4, with the following rewritten paragraph:

Also, the reception unit may receive the specification information from the second telephone as a callout request to the first telephone, and the telephone network may further include ~~a waiting unit operable to wait for an instruction from the second telephone after the notification of the region information, the instruction being one of approving and canceling a call, and a call unit operable to call the first telephone if the instruction approving the call is received or if a predetermined time period elapses without receiving [[the]] an instruction canceling the call from the second telephone after notifying the region information to the second telephone.~~

Please replace the paragraph beginning at page 8, line 7, with the following rewritten paragraph:

A method ~~[[of]]~~ pertaining to the present invention is a display method for having a telephone provided with a storage unit displaying display a local time of a locality of a callee performed in a telephone, and includes the steps of acquiring a telephone number of the callee and region information relating to [[a]] the locality of the callee, judging whether the telephone number is a

telephone number satisfying a predetermined condition that enables international roaming in a telephone network of a region in a different time zone, storing the telephone number, identification information identifying the callee of the telephone number, and the region information in association with each other in the storage unit, based on a user operation, if judged in the affirmative, calculating the local time of the locality using shown by the stored region information, with reference to the storage unit, if a user operation selecting one the telephone number and the identification information is performed, and displaying the local time.

Please cancel the paragraph beginning at page 8, line 13.

Please cancel the paragraph beginning at page 8, line 16.

Please cancel the paragraph beginning at page 8, line 22, and bridging to page 9, line 1.

Please cancel the paragraph beginning at page 9, line 2.

Please cancel the paragraph beginning at page 9, line 10.

Please replace the paragraph beginning at page 9, line 23, and bridging to page 10, line 10, with the following rewritten paragraph:

Also, [[A]] a method [[of]] pertaining to the present invention is a display method for displaying a local time of a locality of a first telephone performed in a telephone system that includes a second telephone provided with a storage unit and a telephone network for managing a movement of the first telephone. The method includes the steps of recording, in the telephone network, region information relating to the locality of the first telephone; receiving, in the telephone network, specification information specifying the first telephone from the second telephone; notifying, in the telephone network, the region information to the second telephone, upon receipt of the specification information; acquiring, in the second telephone, the region information from the telephone network [[to]] a telephone number of the first telephone; judging whether the telephone number is a telephone number satisfying a predetermined condition that enables international roaming in a telephone network of a region in a different time zone; storing, in the second telephone, the telephone number, identification information identifying a callee of the telephone number, and upon receipt of the specification information, acquiring, in the second telephone, the region information notified from the telephone network in association with each other in the storage unit, based on a user operation, if judged in the affirmative; calculating, in the second telephone, the local time of the locality using shown by the stored region information, with reference to the storage unit, if a user operation selecting one of the telephone number and the identification information is performed; and displaying, in the second telephone, the local time.

Please replace the paragraph beginning at page 10, line 11, with the following rewritten paragraph:

Also, the specification information may be received from the second telephone as a callout request to the first telephone, and the method may include the further ~~steps~~ step of ~~waiting, in the telephone network, for an instruction from the second telephone after the notification of the region information, the instruction being one of approving and canceling a call; and calling, in the telephone network, the first telephone if the instruction approving the call is received or a predetermined time period elapses without receiving~~ [[the]] an instruction canceling the call from the second telephone after notifying the region information to the second telephone.

Please replace the paragraph beginning at page 10, line 21, with the following rewritten paragraph:

A computer program ~~[[of]]~~ pertaining to the present invention may be a machine-readable program for causing a computer to execute the steps included in any of the above methods.

Please cancel the paragraph beginning at page 10, line 24.
